2021 SMALL BUSINESS CREDIT SURVEY

Arizona State Report

Executive Summary

The Small Business Credit Survey (SBCS) is an annual survey that collects information about the business performance, financing needs and options, and borrowing experiences of firms with 500 or fewer employees. Responses to the SBCS provide insight into the dynamics behind aggregate lending trends and about noteworthy segments of small businesses.

This report analyzes data from the 2021 SBCS for the State of Arizona.

The findings in this report show data for employer firms only (employer firms are firms with at least one employee in addition to the owner(s)). The results are weighted to reflect the full population of small businesses. The SBCS is not a random sample; therefore, results should be analyzed with awareness of potential methodological biases.

Survey Response¹

- + Results summarized below reflect small business trends in Arizona. National results are included in the charts for comparison purposes.
- + In Arizona, there were 194 responses for the 2021 SBCS. Nationwide, there were 10,914 responses.
- + The 2021 SBCS was fielded September 8 through November 19,2021 and is the second SBCS conducted during the COVID-19 pandemic.

Surveyed Firm Demographics

- + The majority of Arizona firms have 1-4 employees (54%) and had 2020 revenues of \$500,000 or less (65%).
- + Firms in Arizona tend to be either newer, with 36% in business for five years or less, or well-established, with 24% in business for over 21 years.

¹ For a full discussion of the survey methodology, see <u>Small Business Credit Survey 2022 Report</u>, page 27.

Firm Performance, Challenges and Expectations

- + The COVID-19 pandemic continues to have a significant impact on small businesses.
 - 70% of Arizona firms report that the pandemic is currently having a negative effect on their business; this is compared with 77% of firms reporting a negative effect nationally.
- + 60 % of firms experienced supply-chain issues during the past 12 months, consistent with the percentage of firms that experienced supply-chain issues nationally.
- + Despite these challenges, business owners in Arizona appear optimistic that their businesses are poised for growth in terms of having expectations that revenue will increase in the next 12 months (72%) and having expectations that their workforce will increase (53%) in the next 12 months.

Pandemic-related Financial Assistance

- + 67% of firms in Arizona sought some type of pandemic-related financial assistance in 2021, which was lower than the national share of firms seeking assistance (77%).
 - o Of those that applied for financial assistance, the two most sought sources were the federal Economic Injury Disaster Loan (EIDL) program and federal the Paycheck Protection Program (PPP).

Financing Need and Credit Products

- + 72% of firms had some level of debt outstanding at the time of the survey, compared with 74% nationally.
- + 35% of firms applied for financing (excluding applications for pandemic-related financial assistance) in the prior year, and the most common reason to seek financing was to meet operating expenses.
- + Of firms who applied for financing, 71% applied for a loan or line of credit.
