

# The Chicago Neighborhood Stabilization Program

Ellen Sahli  
Department of Community Development

March 18, 2010

# Investing in the Community

- Over the past 10-15 years, the City and its partners have invested millions of dollars on projects aimed at revitalizing our neighborhoods.
- New schools, police stations, fire stations, libraries, affordable housing, retail centers
- The foreclosure crisis is threatening those investments and the stability of long-standing community anchors.

# Build on Existing Relationships

Strong history of collaboration with:

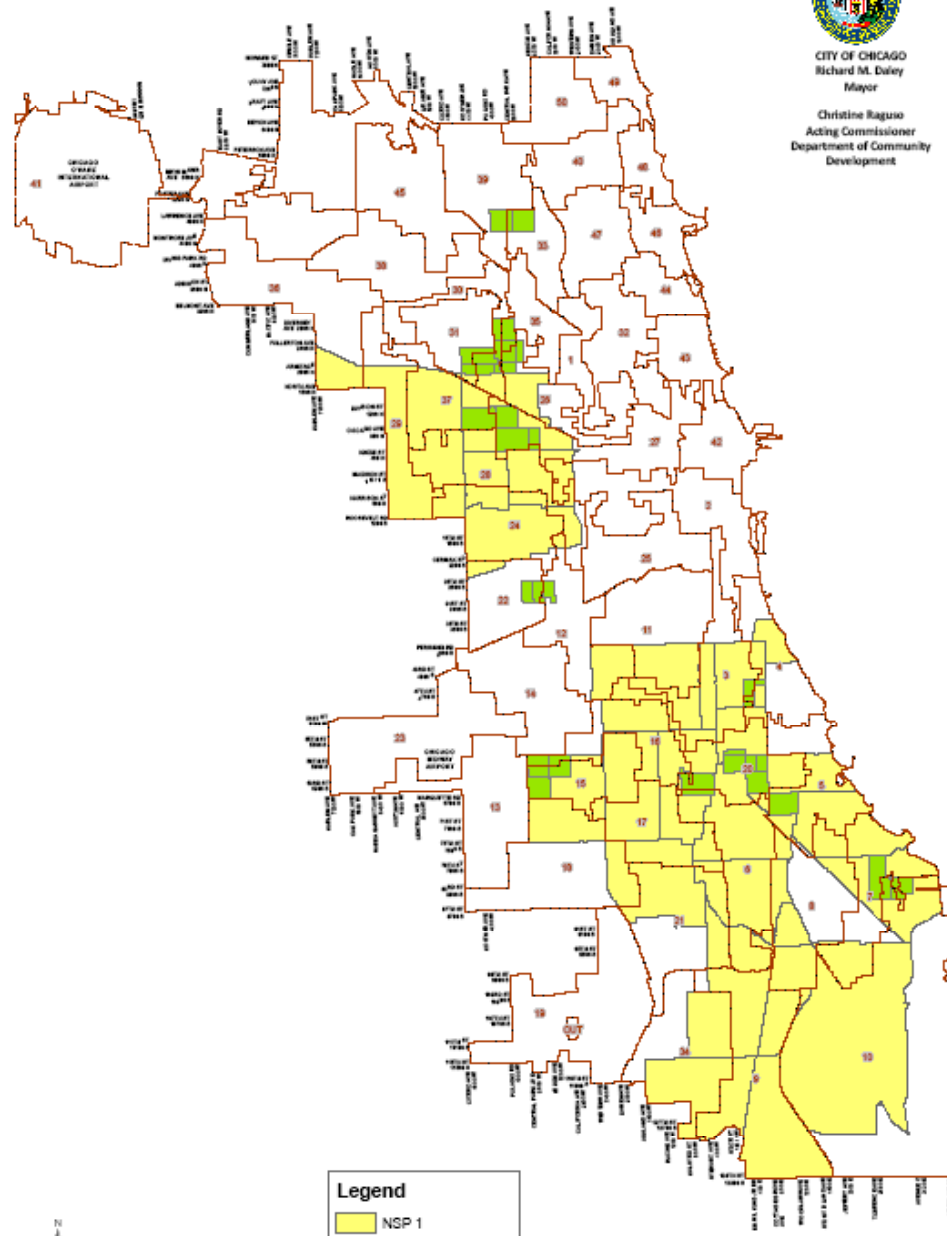

- Community development corporations
- Developers (non-profit and for-profit)
- Community-based organizations
- LISC
- Community Development Financial Institutions
- Other City departments

# NSP AREAS OF GREATEST NEED

CITY OF CHICAGO  
Richard M. Daley  
Mayor

Christine Ragusa  
Acting Commissioner  
Department of Community  
Development

# Identifying Target Areas

- To protect recent development and make a significant impact, NSP investments must be strategic and targeted.
- NSP target areas have been identified based on proximity to recent public and private investments.
- Government intervention is necessary to stabilize all these areas.

# City of Chicago's NSP Strategy

- Goal: assist 2,000-2,500 units over 3-5 years in targeted areas utilizing NSP 1 & 2 funds
- Focus on acquisition and rehab of bank-owned properties
- Determine most appropriate disposition option:
  - Homeownership
  - Rental
  - Demolition
- A non-profit organization, Mercy Portfolio Services, is working at the direction of the City to acquire, redevelop, and reposition the properties.

# Developing the Chicago NSP Infrastructure

- Established a rolling RFQ process to identify developers to rehab homes
  - RFQ posted at [www.chicagonsp.org](http://www.chicagonsp.org)
- Identified vendors to assist in implementing the program
- Developed a financial model to ensure ready access to capital for acquisition and rehab
  - NSP is a reimbursement grant: no up-front funds

# Status of Chicago NSP

- Identified more than 1,100 vacant units for potential acquisition
- Assessed more than 1,000 vacant bank-owned units
  - Assessment includes an appraisal, scope of work, and financial analysis
- Made offers on more than 650 units
- Acquired 205 units (65 properties)
- Additional 97 units (28 properties) under contract and set to close in the next 30-60 days
- Rehab underway on first group of properties
- More than \$26 million, or 48% of the NSP 1 grant, has been committed to acquiring and rehabbing properties

As of March 4, 2010
