

TRENDS IN DELINQUENCIES AND FORECLOSURES IN OREGON

January 2011

National Trends

- Even though NBER officially announced the recession's end in June of 2009, pace of recovery remains slow
 - ▣ Unemployment rate in November rose to 9.8% from 9.6%, demonstrating continued weakness in the labor market
 - On the more positive side, the private sector has been adding jobs each month, and part of the rise in unemployment is due to an increase in the labor force-that is, the number of people who started looking for work
- ▣ Housing is the one major sector of the economy where we still do not see signs of recovery
 - New and existing home sales remain near historic lows, and inventories of foreclosed homes remain very high
- ▣ Public sector budget crisis in many states is of major concern, and threatens viability of services to LMI communities

National Trends

Unemployment continues to hover around 10%

Recovery, particularly in labor market, remains elusive

Case-Shiller Index shows continued softness in housing market

Case-Shiller National House Price Index
(2000 = 100, Quarterly)

FHFA House Price Index rises slightly in 3rd Qtr of 2010
