

Middle-Income, Non-Metropolitan Distressed and Underserved Geographies Vermont

Note: The Federal Reserve, FDIC, and OCC have issued new CRA regulations, effective on September 1, 2005. Under these new regulations, the fourth element of the definition of community development—revitalizing and stabilizing LMI geographies—has been expanded to include distressed and/or underserved middle-income non-metropolitan geographies. For more information on what activities qualify in these areas, see the questions and answers on "revitalizing and stabilizing" at <http://www.ffiec.gov/cra/qnadoc.htm>.

This map is for reference only. For the official list of covered geographies, visit <http://www.ffiec.gov/cra/examinations.htm>.
