

Green Sessions

This conference will explore sustainable, affordable low-cost options for affordable single-family construction, Multifamily retrofit and rehab. Covered topics will be:

- site design
- material selection
- energy efficiency
- passive solar and solar design
- sustainable planning
- architectural design
- HVAC systems
- Alternative building methods and materials

Information will be provided on financing, cost estimates, resources, available grants and rebates. With this knowledge you could reduce energy costs and create more affordable housing.

Through the use of case studies of actual projects, we will demonstrate that Greenbuilding and sustainable technologies can be incorporated into new and existing properties in an efficient way.

With these resources and methods at your fingertips, you can create or remodel properties to reduce their carbon footprint.
