TRENDS IN DELINQUENCY AND FORECLOSURES IN CENTRAL CALIFORNIA

August 2009

Darryl Rutherford, Community Development Department, Federal Reserve Bank of San Francisco
Outline of Presentation

- National Trends
  - Recession and turmoil in financial markets has had broad repercussions, especially for lower-income households
    - Signs of stabilization in financial markets and consumer spending

- California
  - Rising unemployment across broad range of sectors
    - Ongoing weakness in the labor market may continue to push up foreclosures and poses risks to the recovery of the housing sector
  - Trends in foreclosures
    - California saw a sharp rise in foreclosure starts in 1st quarter 2009, followed by slight drop
  - House prices continue downward trend

And Certain Market Indicators are Looking Up

- Financial markets are improving, and the crisis mode that has characterized the past year is subsiding.

- The housing sector, which has been at the center of the economic and financial crisis, also looks to be stabilizing—albeit, at a very depressed level. Housing starts and new home sales have leveled off, and existing home sales have edged up in recent months.

- Income from the federal fiscal stimulus, as well as some improvement in confidence, has helped stabilize consumer spending. Since consumer spending accounts for two-thirds of all economic activity, this is a key precondition for economic recovery.
Nevertheless, Recession is Likely to Have Long-Lasting Impacts, Especially for Lower-Income Families

- 48 states face significant budget shortfalls, and are cutting public services such as health benefits for children and public education.

- Tightening lending standards will make it more difficult for families and small businesses to access credit: the Federal Reserve’s quarterly Senior Loan Officer Opinion Survey on Bank Lending Practices found that 65 percent reported tightened standards for the fourth quarter of 2008.

- CDFIs are increasingly facing liquidity constraints; their borrowers are in more need of ‘patient’ capital at the same time it is becoming harder to provide it.
California Trends
Unemployment Rate Rising Steeply in 1st Half of 2009

Conclusions
Continued Need for Foreclosure Prevention

- Important to reach borrowers with ‘preventable’ foreclosures
  - **Borrower Outreach Events**
    - Create a foreclosure prevention workbook -- for an example see Arizona’s:
  - **Making Homes Affordable**
    - Federal program provides both loan modification and refinance options
    - Online form available that allows borrowers to assess if they qualify for the program
      - [http://makinghomeaffordable.gov/eligibility.html](http://makinghomeaffordable.gov/eligibility.html)
Preventing Foreclosure Scams

- Foreclosure scams are proliferating, especially in markets with investor interest
  - Some counties are sending notices to all delinquent borrowers to warn them about foreclosure scams
  - Free media kit available from the Federal Reserve which includes a PSA and other resources: [http://www.federalreserveeducation.org/pfed/mediakit.cfm](http://www.federalreserveeducation.org/pfed/mediakit.cfm)
  - NeighborWorks PSA: [http://www.youtube.com/nwpad](http://www.youtube.com/nwpad)
- Other 5 Tip brochures and resources available from the Federal Reserve: [http://www.federalreserve.gov/consumerinfo/fivetips.htm](http://www.federalreserve.gov/consumerinfo/fivetips.htm)
Stabilizing Communities and Helping Families After Foreclosure

- Develop service delivery and resources for families who go through foreclosure
  - Rental housing assistance
  - Credit repair
  - Minimizing disruption for children (e.g. allowing them to finish the school year in their old school)

- Minimize negative spillover effects of vacant properties on surrounding neighborhood
  - Ensure servicer maintenance of REOs
  - Work with lenders/servicers to acquire and rehab foreclosures for affordable housing
