TRENDS IN DELINQUENCY AND FORECLOSURES IN CENTRAL CALIFORNIA

January 2009
Outline of Presentation

- National Trends
  - Rising foreclosures
  - House price declines
  - Rising unemployment

- California
  - Trends in foreclosure
  - Housing market softening
  - Rising unemployment
  - Scale of loan modifications still falls short of need
National Trends
Foreclosures rose steadily in 2008, with wide repercussions for US economy

- A slight decline in the national foreclosure rate in the 3rd Quarter of 2008

Factors driving foreclosures nationally

- House price declines
- Rising unemployment, coupled with turmoil in financial and credit markets, may further influence foreclosure rate going forward
After Steady Rise, National Foreclosure Starts Dipped Slightly in 3rd Quarter of 2008

Conclusions
Conclusions

- Multi-pronged strategy is needed to stem foreclosure crisis
- Continued foreclosure prevention efforts are critical
  - Foreclosure Prevention: Borrower Outreach, Refinance and Loan Modification (including principal reduction)
    - Reaching these borrowers now may help to prevent unnecessary foreclosures
    - Encourage borrowers to contact the Hope Hotline by calling (888) 995-HOPE or visiting www.995hope.org
Conclusions

- Other strategies that can help to mitigate the negative impacts of foreclosure on families and neighborhoods
  - Addressing vacant properties: ensuring that servicers maintain properties
  - REO property disposition: return REO properties into productive use, affordable housing
  - Ensuring continued access to credit and homeownership: credit repair, financial education, responsible lending
