TRENDS IN DELINQUENCY AND FORECLOSURES IN HAWAII

September 2010
According to John Williams, Director of Research at the FRBSF, the economic outlook is for a slow and modest recovery.

- Unemployment still a major concern, and unlikely to see significant drops in the unemployment rate in the next year.
- While the housing market appears to be stabilizing, recovery is muted, and construction starts and home sales are both down in the most recent period.
- Growth of real gross domestic product (GDP), the broadest measure of the strength of the economy, is hovering around 2 percent in the current quarter.

- Large “shadow” inventory of properties in delinquency or some stage of the foreclosure process also remains a concern.
