

TRENDS IN DELINQUENCIES AND FORECLOSURES IN CALIFORNIA

January 2011

National Trends

- Even though NBER officially announced the recession's end in June of 2009, pace of recovery remains slow
 - Unemployment rate in November rose to 9.8% from 9.6%, demonstrating continued weakness in the labor market
 - On the more positive side, the private sector has been adding jobs each month, and part of the rise in unemployment is due to an increase in the labor force-that is, the number of people who started looking for work
- Housing is the one major sector of the economy where we still do not see signs of recovery
 - New and existing home sales remain near historic lows, and inventories of foreclosed homes remain very high
- Public sector budget crisis in many states is of major concern, and threatens viability of services to LMI communities

National Trends

Unemployment continues to hover around 10%

Recovery, particularly in labor market, remains elusive

Case-Shiller Index shows continued softness in housing market

Case-Shiller National House Price Index
(2000 = 100, Quarterly)

FHFA House Price Index rises slightly in 3rd Qtr of 2010

Source: Federal Housing Finance Agency (formerly OFHEO), includes refinancing and is not seasonally adjusted

Nationally, delinquencies drop in 2010, but still more than 4.5 million homes in distress

Source: Mortgage Bankers Association, National Delinquency Survey

Despite improvement, high rates of delinquency remain concentrated in western and southern states

HAMP modifications down; borrowers still face challenges in obtaining permanent modifications

Source: HAMP Service Performance Report Through October 2010

Household debt falling from 2008 peak

Total Debt Balance and Composition

Many states within 12th District face severe budget shortfalls

Total End-of-Year Shortfall as Percentage of 2010 Budget

California Trends

California's unemployment still well above national average

Source: Bureau of Labor Statistics

Unemployment rates particularly high in Central Valley and Inland Empire

California house prices appear to be stabilizing

FHFA (formerly OFHEO) House Price Index
(2000=100, quarterly)

Source: Federal Housing Finance Agency (formerly OFHEO)

Northern California house prices steady

FHFA House Price Index: Northern California
(2000 = 100)

Source: Federal Housing Finance Agency (formerly OFHEO)

Southern California MSA house prices also seem to be stabilizing

FHFA House Price Index: Southern California
(2000 = 100, quarterly)

Housing markets in the Central Valley saw greatest declines, but also starting to stabilize

FHFA (formerly OFHEO) House Price Index: Central California

(2000 = 100, quarterly)

Number of delinquent mortgages seems to be stabilizing, but number of properties in foreclosure process rises

Average household debt falling from 2008 national peak

Source: Federal Reserve Bank of NY

Household debt includes: mortgage accounts, HE revolving accounts, auto loans, credit cards, and student loans
