

ÒSCAR JORDÀ

Òscar Jordà is Vice President of Macroeconomic and Microeconomic Research at the Federal Reserve Bank of San Francisco and Professor of Economics at the University of California, Davis. Professor Jordà received his Ph. D. in economics from the University of California, San Diego in 1997. He began his career at the University of California, Davis and joined the Federal Reserve Bank of San Francisco in 2011.

Professor Jordà's research addresses current issues in macroeconomics using historical data and novel empirical methods. His contributions span monetary policy, international finance and fiscal policy. He is currently exploring the role of private and public debt on the business cycle, asset prices and the fragility of the financial system, as well as their policy implications. Professor Jordà has also developed methods to study the chronology of the business cycle, the dynamics of macroeconomic systems, and forecasting.

Professor Jordà serves on the boards of the *Journal of Business and Economic Statistics*, *Journal of Applied Econometrics*, *Journal of International Economics*, and has served in the boards of *Empirical Economics*, the *Journal of the Spanish Economic Association SERIEs*, and the *Journal of Econometric Methods*.
