Snapshot
Home Care in Alaska

What is Home Care?
Professional home care workers support their elderly and disabled clients with activities of daily living. This workforce enables their clients to remain in their homes and supports their clients’ family members to remain in the labor force.

Growing Need for Home Care Workers

83,000 people 65 and older in Alaska.1
By 2030, this population is projected to increase by 53%, to 127,000.2

87,000 additional disabled individuals in Alaska who could potentially benefit from personal support workers in their homes.3

Rapidly Growing Occupation

Home care is one of the largest and fastest growing occupations, but the need exceeds the supply, drawing unpaid family caregivers from full-time employment to fill the gap.

+ There are 6,480 professional home care workers in Alaska.4
  + This occupation has grown 67% over the past 10 years in Alaska.
+ Alaska is projected to add an additional 7,450 home care jobs by 2028.5
+ Due to high turnover, each year there are projected to be 1,040 home care job openings in Alaska.

Rising Revenues, Persistent Low Wages, High Costs of Home Care

+ The annual median cost of home care in Alaska is $64,156,4 up from $53,589 in 2009.7 This has translated into rising revenues, while low wages persist.
+ Home care industry revenues are $109.6B and projected to increase by 5.1% annually.8
+ In 2019, Alaska home care workers received a median hourly wage of $16.43/hour and a median annual income of $34,740.
  + This rose to $16.66/hour and $35,360 annually in 2020,9 though this increase may be temporary as pandemic subsidies expire.10
Recruitment and retention of workers in this rapidly growing occupation can help support the Alaska economy. 

- Professional home care workers help family members—especially women—to remain in the workforce, but many families are waiting to receive this support.
- Studies have found that raising wages for home care workers leads to lower costs from reduced turnover and from workers’ reliance on public safety net programs.
- Low wages result in thousands of Alaska home care workers in poverty.

Economic Impacts and Racial & Ethnic Disparities

The Alaska home care workforce is disproportionately composed of women of color and immigrant women. Their median age is 45.
