

# Stabilizing Communities in the Wake of Foreclosures: Los Angeles

Melody Nava  
Community Development Department  
Federal Reserve Bank of San Francisco

November 6, 2008

Do not cite or reproduce without permission.

# Overview of Presentation

---

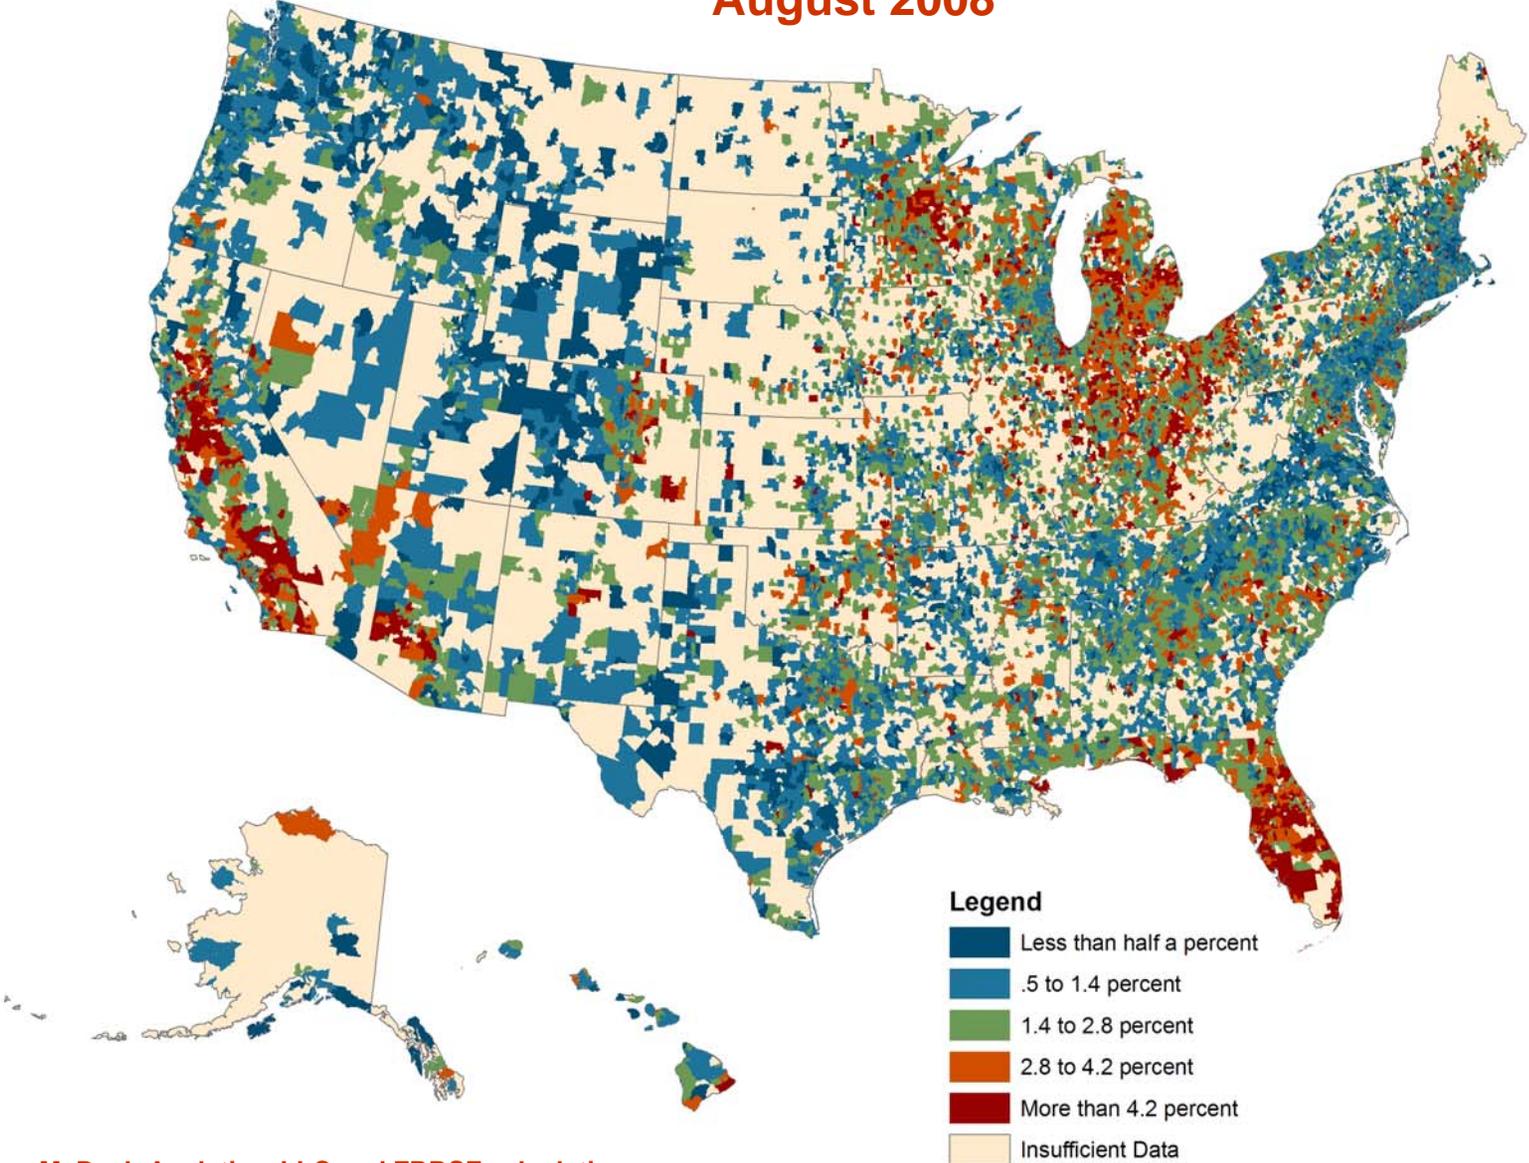

- What are the trends in delinquencies and foreclosures in California?
  - How has Los Angeles been affected?
  - Where are REOs clustered in Los Angeles?
  - What are the limitations of these data in understanding local trends and identifying and acquiring REOs?
- Developing a neighborhood stabilization plan
  - Identifying local data sources to target interventions
  - Identifying partners
  - Identifying strategies and best practices

# Trends in Delinquencies and Foreclosures

# Percent of Mortgage Loans in Foreclosure or REO (by zip code)

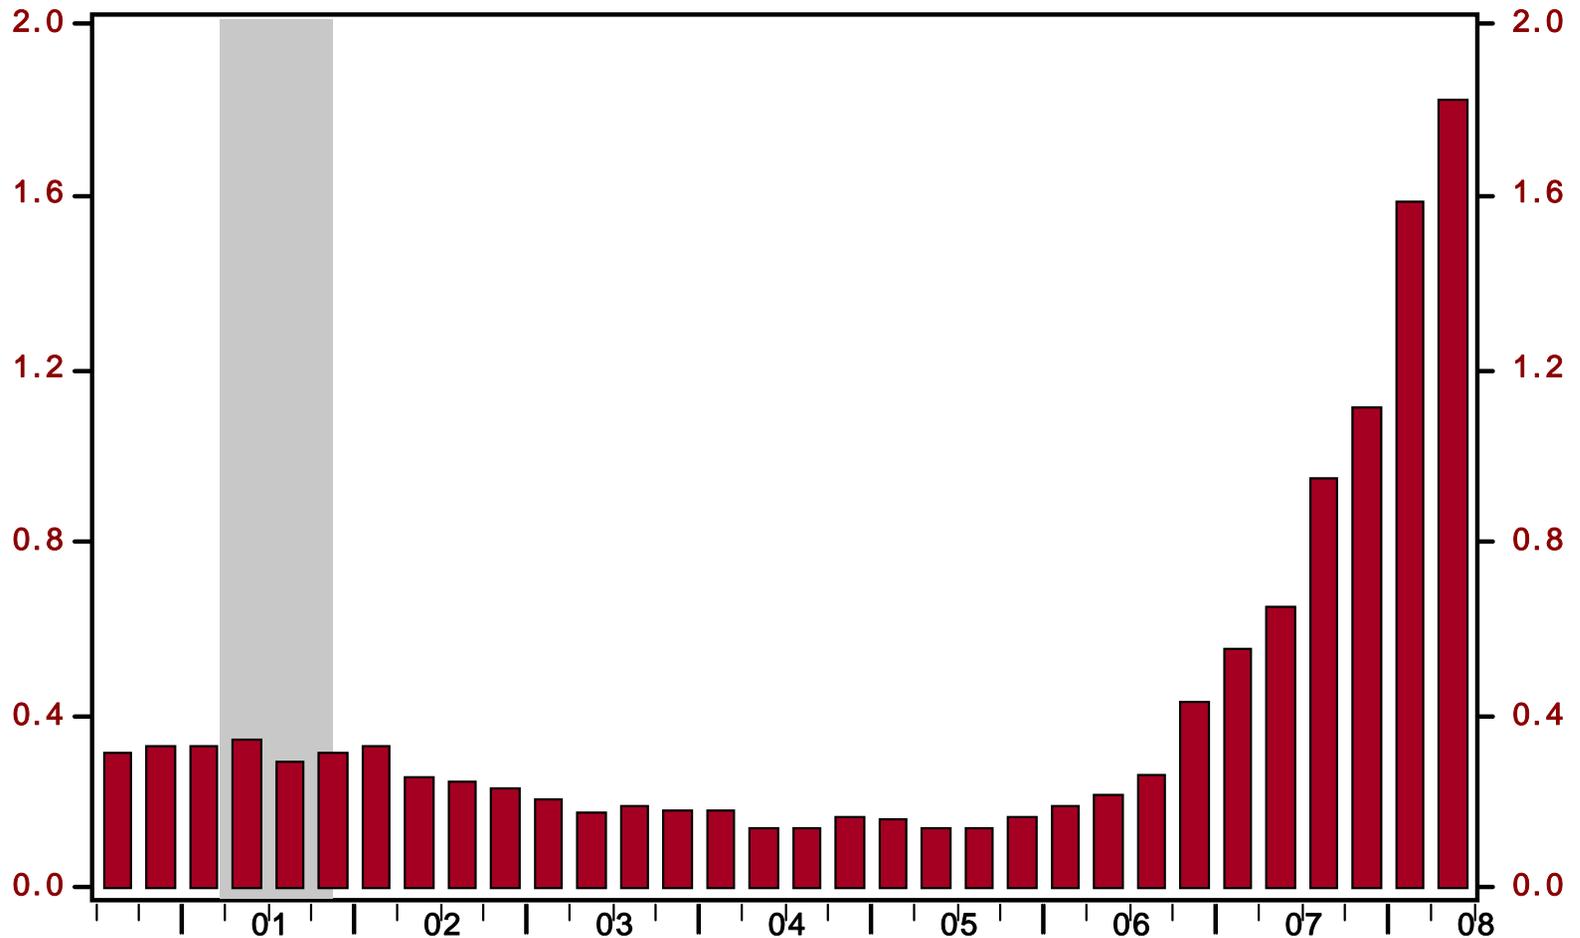

August 2008

# The trouble with foreclosure data

---

- ❑ Data on the real estate and mortgage markets are collected by many different sources, most costly and proprietary
- ❑ As a result, it is important to consider the limitations of data presented
  - Different definitions of subprime may affect the reporting of rates of delinquencies and foreclosures
  - Different methodologies and different sampling methods may affect the reports
  - Aggregated data at the zip code level can mask significant geographic variation and the types of borrowers affected
  - Data is often “old” or “stale”, particularly given the pace of change
- ❑ No comprehensive data system to meet the needs of all partners currently exists

# Especially difficult to assess local REO picture from national data

---

- ❑ Limitations of zip code data
  - The size of the zip code can really affect the number of REO properties
  - Can't see if the REOs are concentrated on certain blocks within the zip
  - Delay in the data: August is most recent data, but these properties may have been sold already
  - Only a sample of loans, not representative of all housing units
    - ❑ We don't know how well national data sets capture REOs at the local level; they're better for conducting national macroeconomic analysis
- ❑ Important to have a way to identify property level data in “real time” – e.g., through an MLS or property registration database

# Stabilizing Communities: Developing a Local Strategy for San Diego

# Stabilizing Communities Online Resources

---

## ❑ Foreclosure Mitigation Toolkit

- Available online at <http://www.frbsf.org/community/issues/toolkit/index.html>
- The resources in the toolkit are presented as a four-step process
  - ❑ Step One: Assess the foreclosure situation
  - ❑ Step Two: Reach troubled homeowners
  - ❑ Step Three: Establish post-foreclosure support systems
  - ❑ Step Four: Stabilize neighborhoods

## ❑ NeighborWorks America

- Stabilizing Communities webpage available at <http://www.stablecommunities.org/>
- Includes case studies of best practices from across the country

# Community Strategies - Identifying REOs at the local level

---

## □ Possible data sources

- County records: most state laws require official notice of defaults and foreclosure to be filed with the county
  - These data are often the “best” source of data, since they are public documents and provide comprehensive information on the property; yet, paper records are still common, making it difficult to access
- Local title company or public records company
  - In Massachusetts, local task force was able to engage a local company that compiles public records electronically and is now using that data to develop targeted interventions
- RealtyTrac and Foreclosures.com, etc.
  - Timely, property level data; limit the number of downloads but can be effective for small geographic areas
- Local Multiple Listing Service

# Community Strategies - Identifying REOs at the local level

---

## □ Other data sources

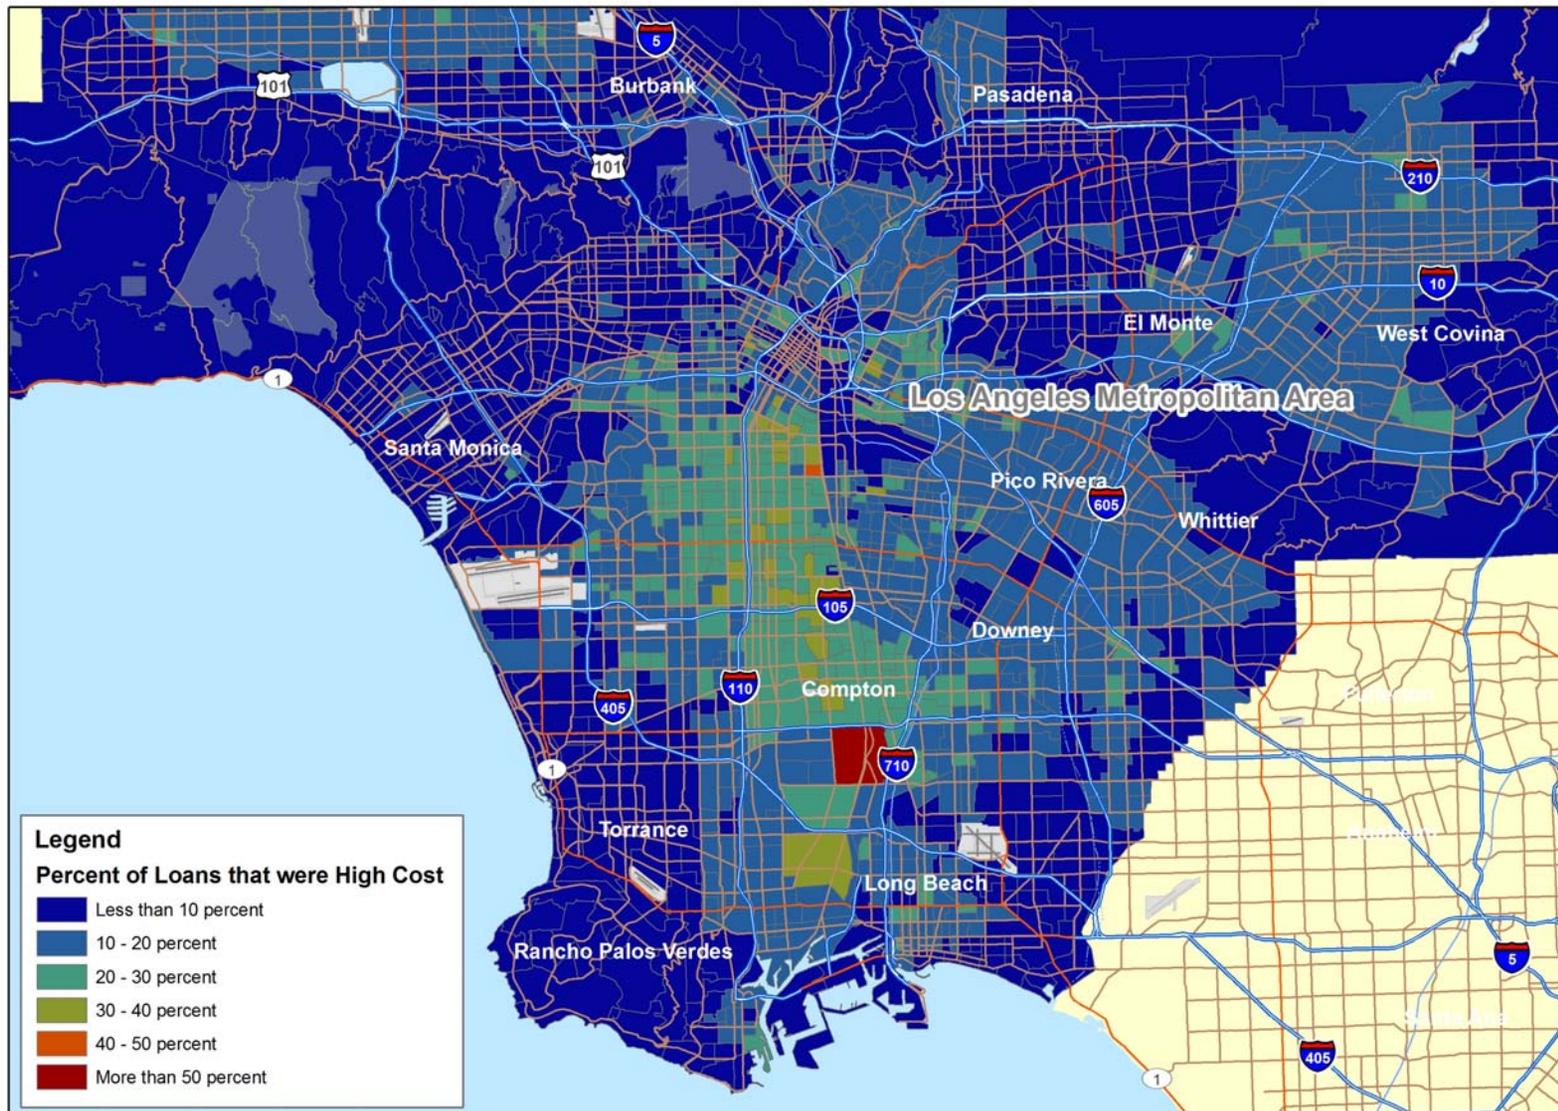

### ■ Identifying share of subprime loans

#### □ 2005 HMDA Data: Conventional Loans with High Interest Rates

- These data can be found at [www.dataplace.org](http://www.dataplace.org)

# Distribution of High Cost Lending in Los Angeles

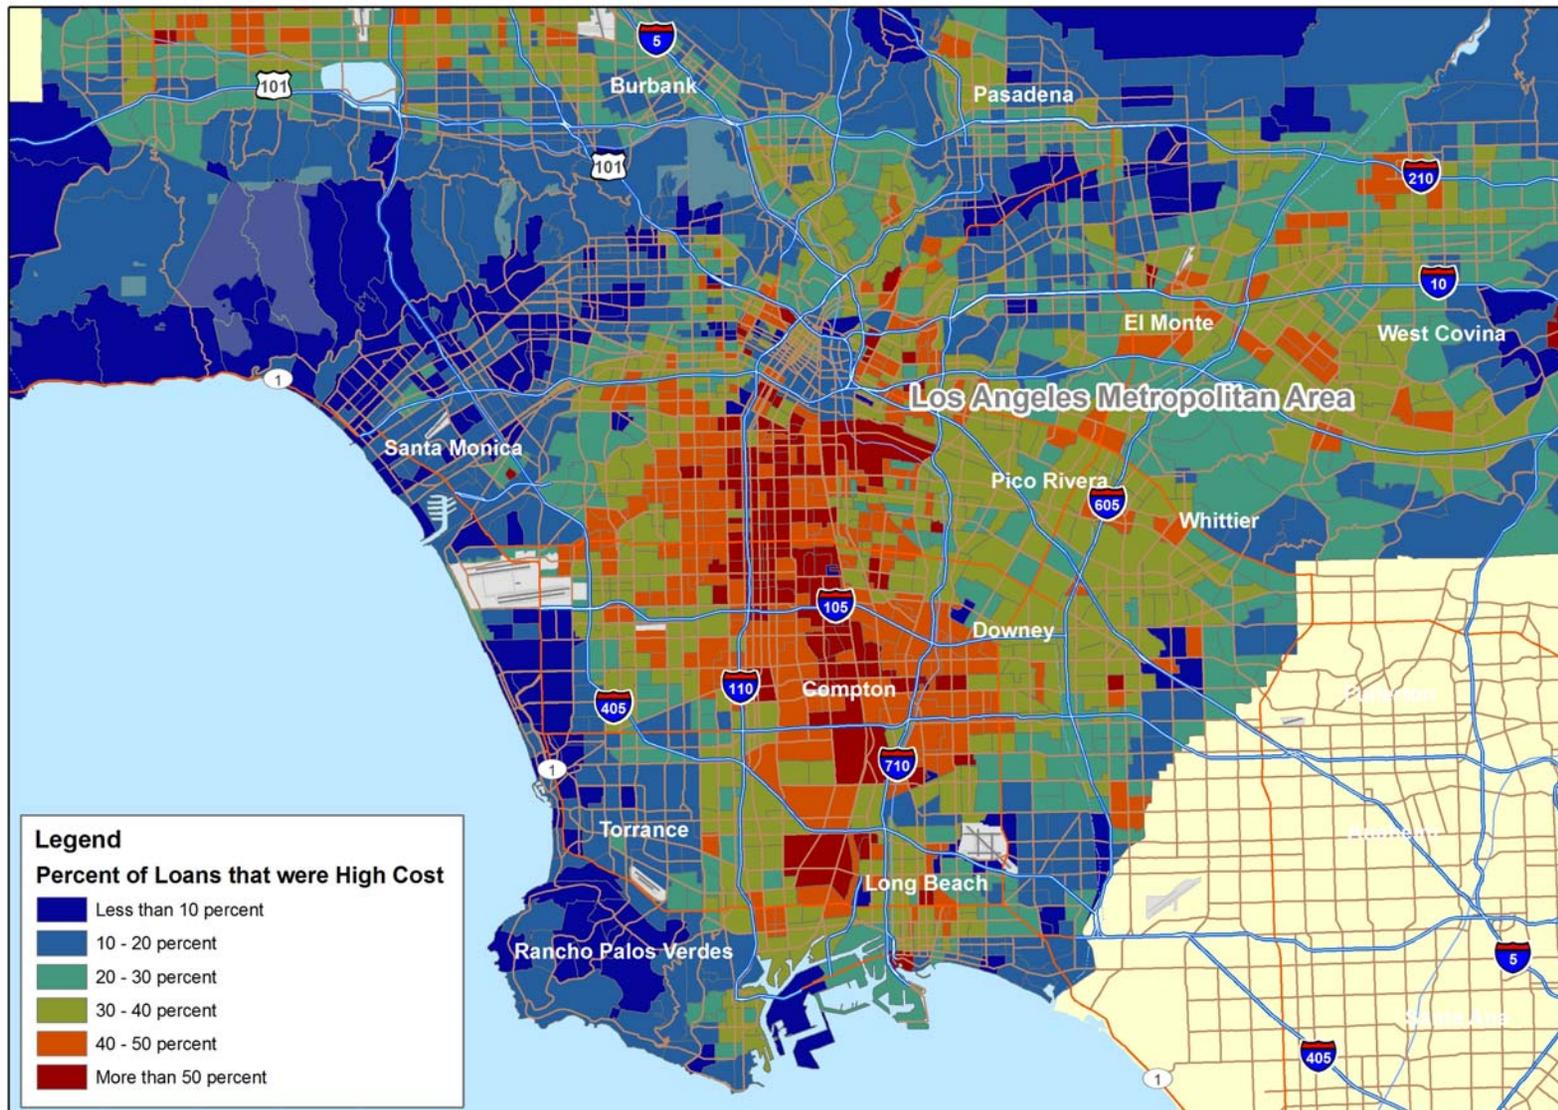

## HMDA 2004

Source: HMDA 2004, FRBSF Calculations

# Distribution of High Cost Lending in Los Angeles

## HMDA 2006

Source: HMDA 2006, FRBSF Calculations

# Community Strategies - Identifying REOs at the local level

---

## □ Other data sources

### ■ Identifying share of subprime loans

#### □ 2005 HMDA Data: Conventional Loans with High Interest Rates

- These data can be found at [www.dataplace.org](http://www.dataplace.org)

### ■ Administrative data: identifying neighborhoods in distress

#### □ Delinquent utility bills

- Water, electricity and other municipal services

#### □ Delinquent property taxes

#### □ Counts of property related crimes

### ■ Census data: identifying affected populations

#### □ Low income households

#### □ Racial/ethnicity breakdowns

## Community Strategies - Addressing Vacant Properties

---

- Goal is to establish **continuity of responsibility** for property, and to help finance the maintenance of vacant properties
  - Code enforcement (e.g. Chula Vista and Stockton)
  - Vacant property registration and fees (e.g. Chicago)
- Identifying responsible party on the property
  - State Law – Georgia SB 531 requires that notice of the foreclosure sale includes the name, address, and telephone number of the “individual or entity who shall have full authority to negotiate, amend, and modify all terms of the mortgage with the debtor.”
- Strategies for taking over abandoned properties
  - Receivership models
  - Tax foreclosure

# Community Strategies – REO Property Disposition

---

- ❑ Intervening before Foreclosure: entails buying the delinquent note before foreclosure and working with borrower first, if not successful, return to either rental or ownership
  - CDFIs: Self Help, Colorado, and Massachusetts
- ❑ Neighborhood Revitalization Approaches: targeting neighborhoods and using ‘traditional’ community development tools to acquire and rehab housing units
  - Neighborhood Progress Inc. in Cleveland
  - Dallas, Rochester, and Chicago
  - DC: New Markets Tax Credits
- ❑ Lender Approaches: working with a single lender to acquire a “bundle” of properties at a discount
  - Bulk Purchase
  - Pilot studies (e.g. HSBC model)
- ❑ Borrower approaches: providing favorable financing to borrowers interested in buying foreclosed properties
  - CAL FHA product

# Key Lessons

---

- ❑ Use data strategically
  - National data sets can't capture local dynamics or “property level” data
  - Engage a local partner (e.g. title company, university, public records co., real estate agent) who can help to identify properties and their owners
- ❑ Cross-sectoral collaboration
  - Importance of political support and the “stick” of regulation
  - Task force model works well, especially when it brings together government, nonprofits, lenders/servicers, and private interests
- ❑ Draw on a wide range of funding sources
- ❑ Use public subsidies wisely
  - Cross-subsidize affordable housing goals by selling some properties at market rate
  - Anticipate long “holding” costs and ensure you have enough capital in addition to subsidy to implement your business plan
- ❑ Evaluate strategies across strong/weak markets
